

**UNIVERSITAS INDONESIA**  
Faculty of Mathematics and Natural Sciences  
Department of Mathematics  
Building D, Kampus UI Depok 16424, Telp: 021 - 7863439,  
Email: sekretariat.math@sci.ui.ac.id, website: <https://www.math.ui.ac.id/>

**MODULE HANDBOOK**

Module designation	<i>Introduction to Data Science</i>
Semester(s) in which the module is taught	<i>1</i>
Person responsible for the module	<i>Sarini Abdullah</i>
Language	<i>Indonesian</i>
Relation to curriculum	<i>Compulsory</i> <i>The module is shared with all of undergraduate study programs in FMIPA UI.</i>
Teaching methods	<i>Flipped Class and Problem based learning using E-learning</i>
Workload (incl. contact hours, self-study hours)	<i>(Estimated) Total workload: <math>2 \times 170</math> minutes per-week, for 16 weeks</i> <i>Lecture time: Friday, 13.00-14.40 pm (100 minutes)</i> <i>Laboratory session: 60 minutes per 2- week</i> <i>Private study (weekly average):</i> <ul style="list-style-type: none"><li>• <i>120 minutes asynchronously before the lecture time</i></li><li>• <i>90 minutes for reflection and evaluation after the lecture time.</i></li></ul>
Credit points	<i>2 SKS (3.18 ECTS)</i>
Required and recommended prerequisites for joining the module	<i>No pre-requisites</i>

<p>Module objectives/intended learning outcomes</p>	<p><i>After completing the course, students are expected to have the following capabilities:</i></p> <p><i>In terms of knowledge:</i></p> <ul style="list-style-type: none"> <li>• <i>Able to identify and explain variety of data types and their relation to the option of methods of data analysis.</i></li> <li>• <i>Aware of- and can explain the ethics in data gathering.</i></li> <li>• <i>Explain the concept of probability (data distribution) for discrete and continuous data.</i></li> <li>• <i>Explain the concept of sampling distribution</i></li> <li>• <i>Able to explain the concept of big-data and data science, and their relationship (or the role of statistics) in those fields</i></li> </ul> <p><i>In terms of skills:</i></p> <ul style="list-style-type: none"> <li>• <i>Able to extract insight from transactional data and provide the interpretation in relation to the problem represented by the data.</i></li> <li>• <i>Able to perform data pre-processing and simple visualization.</i></li> <li>• <i>Able to perform data processing using R/Python (or other open-source packages) for simple data: correlation, regression, clustering, hypothesis testing (1 sample, <math>K \geq 2</math> samples, proportion, variance test)</i></li> </ul> <p><i>In terms of competence:</i></p> <ul style="list-style-type: none"> <li>• <i>Able to identify and explain problems in the real-life application that can be solved using basic statistical methods, data science, and/or big-data technologies</i></li> <li>• <i>Able to use the open-source packages (R and/or Python) for data analysis.</i></li> </ul>
<p>Content</p>	<ol style="list-style-type: none"> <li>1. <i>Introduction to big data and data science: history and properties of big data and data science, data profession and competencies, variety, types and formats of data, types of learning algorithms, technology in/for data science and big data; challenge, trend and opportunity in data science and big data.</i></li> <li>2. <i>Probability and data distributions (discrete and continuous)</i></li> <li>3. <i>Hypothesis testing: 1 sample, <math>K \geq 2</math> samples, proportion, variance</i></li> <li>4. <i>Correlation, simple linear regression, K-means clustering.</i></li> </ol>
<p>Examination forms</p>	<p><i>Post-tests : multiple-choice questions, Mid- and final-exams : multiple choice and essay, laboratory activities : data processing.</i></p>

<p>Study and examination requirements</p>	<p><i>The marking is based on the following components:</i></p> <ol style="list-style-type: none"> <li>1. <i>Post-tests: 15%</i></li> <li>2. <i>Group assignment &amp; lab sessions: 30%</i></li> <li>3. <i>Mid-term exam: 25%</i></li> <li>4. <i>Final exam: 30%</i></li> </ol> <p><i>To successfully pass the module it requires minimum 55% of the total mark.</i></p> <table border="0"> <thead> <tr> <th style="text-align: left;"><i>Mark</i></th> <th style="text-align: left;"><i>Grade</i></th> </tr> </thead> <tbody> <tr> <td>85—100</td> <td>A</td> </tr> <tr> <td>80—&lt;85</td> <td>A-</td> </tr> <tr> <td>75—&lt;80</td> <td>B+</td> </tr> <tr> <td>70—&lt;75</td> <td>B</td> </tr> <tr> <td>65—&lt;70</td> <td>B-</td> </tr> <tr> <td>60—&lt;65</td> <td>C+</td> </tr> <tr> <td>55—&lt;60</td> <td>C</td> </tr> <tr> <td>40—&lt;55</td> <td>D</td> </tr> <tr> <td>&lt;40</td> <td>E</td> </tr> </tbody> </table>	<i>Mark</i>	<i>Grade</i>	85—100	A	80—<85	A-	75—<80	B+	70—<75	B	65—<70	B-	60—<65	C+	55—<60	C	40—<55	D	<40	E
<i>Mark</i>	<i>Grade</i>																				
85—100	A																				
80—<85	A-																				
75—<80	B+																				
70—<75	B																				
65—<70	B-																				
60—<65	C+																				
55—<60	C																				
40—<55	D																				
<40	E																				
<p>Reading list</p>	<ol style="list-style-type: none"> <li>1. <i>Baesens, B. (2014). Analytics in a big data world: The essential guide to data science and its applications. John Wiley &amp; Sons. (general introduction to data science and big data)</i></li> <li>2. <i>Cielen, D., Meysman, A., &amp; Ali, M. (2016).
